

Global Weather Resources

Global Weather from the Weather Window

The Weather Window is a collection of sub sites run by weather industry experts. Plus MailASail's weather responder system which then streamlines access your favourite weather data.

Frank Singleton was a senior forecaster with the UK Met Office in his mid-career. His final post was as Director of the Observations Division. He cruises a HallbergRassy 34. He knows about weather and sailing.

Chris Tibbs is a professional forecaster and has been the weather router for a number of sailing races. He regularly offers weather advice and training for the ARC events.

Professional Weather Routing Services

Rather than spending a fortune on downloading huge quantities of weather data to your yacht, it can often be more cost effective ask a professional on shore (with broadband) to download all that data for you and summarise it

- [Professional forecasting and Weather Routing from Chris Tibbs](#)

- [Predict Wind](http://www.predictwind.com/what-predictwind-forecast/cruising/#OffshoreCruising) handles wind forecasting for the America's Cup and Volvo Ocean Race and have a special offer for offshore cruisers <http://www.predictwind.com/what-predictwind-forecast/cruising/#OffshoreCruising>
